Art Unit: 1652

DETAILED ACTION

1. Claims 1-12 are pending.

Specification

- 2. The ATCC deposit number on page 1, last line and page 4, line 6 is missing.
- The use of the trademark "pBLUESCRIPT" has been noted in this application. It should be capitalized wherever it appears and be accompanied by the generic terminology.

Although the use of trademarks is permissible in patent applications, the proprietary nature of the marks should be respected and every effort made to prevent their use in any manner which might adversely affect their validity as trademarks.

4. The address of the American Type Culture Collection has changed. The new address, effective March 23, 1998, is:

American Type Culture Collection
10801 University Boulevard
Manassas, VA 20110-2209

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Application/Control Number: 09/619,032

Art Unit: 1652

6. Claims 1-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

- 7. The term "alpha-galactose bond" in claim 1, 6 and 7 is a relative term which renders the claim indefinite. The term "alpha-galactose bond" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention. It is unclear what an alpha-galactose bond is and if it is the bond which an alpha-galactosidase cleaves.
- 8. Claim 7 is unclear as to where the alpha-galactose bond is located. In claim 6, from which claim 7 depends upon, raffinose is the compound having the alpha-galactose bond.
- 9. Claim 8 is unclear as to what a combination thereof would comprise. As claimed, it appears that the compound is contained in a member of a combination of the lentil or bean family, as opposed to a compound found in a combination of the members of the lentil or bean family.
- 10. Claims 2-5 and 9-12 are indefinite because they depend upon an indefinite base claim and fail to correct the problem.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686

Application/Control Number: 09/619,032

Art Unit: 1652

F.2d 937, 214 USPQ 761 (CCPA 1982); In re Vogel, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, In re Thorington, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

12. Claims 1-9 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 2 of U.S. Patent No. 5,958,751. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims are directed to a method for hydrolyzing alpha-galactose bonds by contacting an enzyme 70%, 90% or 100% identical to the enzyme of SEQ ID NO: 4 with a compound having an alpha-galactose bond. Compounds containing sugars which are hydrolyzed by an enzyme of SEQ ID NO: 4 are well known in the art.

Conclusion

13. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Peter Tung, Ph.D. whose telephone number is (703) 308-9436. The examiner can normally be reached on Monday-Friday from 9:00 to 5:30.

Application/Control Number: 09/619,032 Page 5

Art Unit: 1652

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ponnathapu Achutamurthy, Ph.D., can be reached on (703) 308-3804. The fax phone number for the organization where this application or proceeding is assigned is (703) 308-0294.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0196.
